INSTALLATION

Group	Installation Method
40cm - 87cm	4.1 PRECAUTIONS BEFORE INSTALLATION

The bottom of the infant carrier B should be in close contact with the vehicle seat cushion to ensure that the A and the C are in balance; then D should be in close contact with the vehicle backrest.

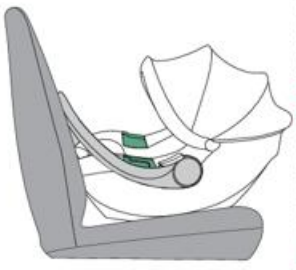

4.2 INSTALLATION METHODS: ADULT THREE-POINT SEAT BELT

Head Padding & Body Support

Note: When the child is over 75cm, the small headrest and Cushion 6 should be removed.

FIRST ▶

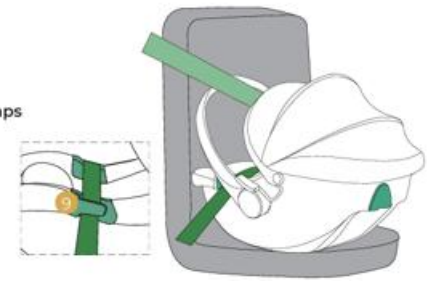

Step 1: Place the baby into the infant carrier;
Step 2: lock the buckle 7;
Step 3: tighten the harness adjuster strap 10; then put the infant carrier in reverse on the vehicle seat.

* Ensure the infant carrier to be in close contact with the vehicle seat backrest (please refer to the precautions before installation for details)

SECOND ▶

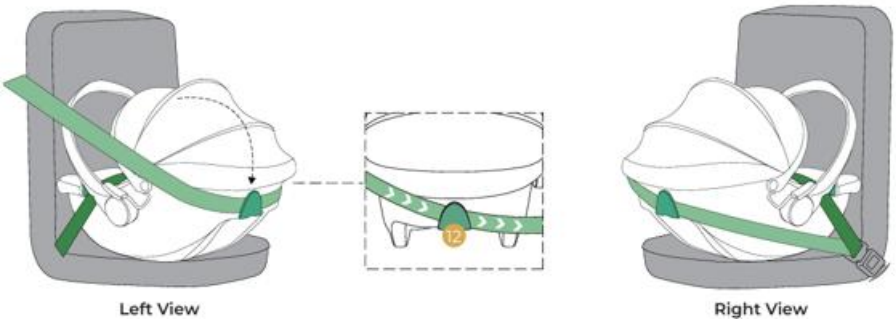

shoulder straps
lap straps

Left View

Pull out the adult three-point belts, then pass the lap strap through the side guide hook of body 9 on the left and right sides of the infant carrier buckle up and pull it tightly

CHILD RESTRAINT SYSTEM INFORMATION

Right View

Pull up the shoulder strap, wind it into the belt guide groove of body 12 behind the infant carrier,and then adjust the adult three-point belt to ensure that it is tightened.

Ensure the seat belt is not twisted and tighten it as much as possible without causing discomfort to the child.

* When using, it should be confirmed that the buckle of the adult 3-point belt does not interfere with the main load-bearing contact point of the child restraint system. If there is any doubt or uncertainty, please contact the manufacturer of the child restraint system for further guidance or assistance.
